

Smarts Onboarding: Email version.

Part 1

Step 1 – Open Your Invite Link and Choose “Email”

Click on the invitation link you received from your sponsor.

When the page opens, tap **“Connect Wallet”** and then select **“Email”** at the bottom of the list. This allows you to register using your email address instead of a crypto wallet.

Step 2 – Create Your Account

On the Email Login screen, tap **“Don’t have an account? Register now.”**

This will take you to the registration form where you can create your SMARTS account using your email address.

Step 3 – Complete Your Registration

Enter your **email address** and tap “**Send Verification Code.**”

Check your inbox (and spam folder) for the code, then enter it in the field provided.

Next, create a **password** and confirm it below.

Make sure your password has at least 8 characters, including uppercase, lowercase, numbers, or special symbols.

Finally, tap “**Register**” to complete your account setup.

Step 4 – Refresh the page!!

After Register, tap “**Refer**” first, then go to “**MEV → MEV Bot.**”

This will take you to the next step, where you’ll confirm the invitation code and create your username.

Is it just to update the page.

Step 5 – Confirm Your Automatically Filled Invitation Code

A pop-up window will appear showing the **referral code**, which is the same as the one in the link you received from your friend.

The code is filled in automatically — simply tap **“Confirm.”**

This step connects your new account to your sponsor’s team in the SMARTS community.

Step 6 – Join the SandwichSociety Community

After confirming your invitation code, a pop-up will appear saying **“Welcome to Join SandwichSociety Community.”**

Simply tap **“Confirm”** to continue.

Step 7 – Create Your Nickname

You'll now be asked to set your **nickname**, which will be your public name inside the SMARTS community.

Enter your preferred nickname in the field labeled *"Please Enter a Nickname"* and then tap **"Confirm."**

✅ Once confirmed, your registration is complete, and your account is ready to use!

✅ Your account is now successfully registered.

You can now deposit, activate your MEV strategy, and start earning automatically through SMARTS!

Part 2

Step 1 – Open Your Deposit Wallet

To fund your account, tap **the green wallet icon** (as shown in the image).

This opens your **Deposit Wallet**, where you can view your available balance for different currencies such as **USDT, USDC, and SOL**.

Then tap **Deposit** to proceed.

Step 2 – Select Currency and Deposit

Next, choose which token you want to deposit – **USDT, USDC, or SOL**.

After selecting your preferred currency, the system will generate a **unique wallet address** for you. Copy this address and send the chosen token from your Phantom Wallet (or another wallet/exchange) to this address.

- ✓ Once the transaction is complete, your funds will appear in your SMARTS **Deposit Wallet** within a few seconds or minutes, depending on network speed.

Step 3: Activate Your MEV Strategy

To start earning with the MEV bot, you'll need to complete this quick step:

Scroll down on the MEV Bot page and tap the green "Activate" button to unlock access.

👉 This is a one-time activation at a discounted price (e.g. \$49.90).

👉 Make sure your wallet balance meets the minimum amount (49,90 USDT or equivalent).

✅ Once this step is done, your Bot is activated, and you can go to next step.

📌 Note: Activation is only required once per account. After that, you only manage deposits and contract renewals.

Part 3

Step 1

Activate Your Contract

After completing the Bot activation, scroll back to the top of the MEV Bot page.

Here you will see the "Activate Now" button.

Tap Activate Now to start your contract.

Make sure you have at least 20 USDT (or equivalent) in your wallet before activation.

Once activated, the bot will automatically begin scanning and executing profitable MEV opportunities for you.

Step 2: Decide on a Contract – Longer = More Profitable

The image displays four screenshots of a trading interface, arranged in a 2x2 grid, showing the process of activating a contract for SOL. Each screenshot shows the 'Available' balance as 27.68 SOL.

Top Left Screenshot: The activation amount is set to 20 USDT. The contract duration is 1 day. The profit sharing ratio is 50:50. The maximum pledge amount is 100. The remaining available order quantity is 1 order.

Top Right Screenshot: The activation amount is set to 20 USDT. The contract duration is 7 days. The profit sharing ratio is 55:45. The maximum pledge amount is 300. The remaining available order quantity is 1 order.

Bottom Left Screenshot: The activation amount is set to 100 USDT. The contract duration is 30 days. The profit sharing ratio is 65:35. The maximum pledge amount is 1000. The remaining available order quantity is Unlimited.

Bottom Right Screenshot: The activation amount is set to 100 USDT. The contract duration is 100 days. The profit sharing ratio is 80:20. The maximum pledge amount is Unlimited. The remaining available order quantity is Unlimited.

Before funding your account, **decide on a contract duration:**

- The **longer the contract**, the **better the profit-sharing ratio**.
- The **100-day plan** is the most profitable, giving you **80% of the profits**.
- You can also enable **Auto-Renewal** and **Auto-Reinvest** to let the system grow your capital automatically.

Example: With just \$1,000 and 1% gross daily profit, fully reinvested, your balance could grow to nearly **\$2,700+ in 100 days**.

NEW!! Optional Contract – 180 Days (High-Yield Plan)

For users who prefer maximum growth, the **180-day contract** offers the **highest profit-sharing ratio (up to 90 / 10)** — meaning you keep 90 % of all profits generated by the MEV bot.

Unlike shorter contracts, the 180-day plan is designed for **long-term compounding** and cannot be redeemed early. Your funds remain locked for the full duration, allowing the system to compound and optimize performance without interruption.

✓ Key advantages:

- Highest daily ROI potential among all contract types
- Fully automated **reinvestment** can be enabled for exponential growth
- Ideal for users aiming for stable, long-term returns

💡 *Tip:* Activate “**Automatically Reinvest Profits**” to maximize growth throughout the 180-day period.

Part 4 – Find and Share Your Referral Link

Once your account and MEV bot are active, you can invite others to join the community and earn team rewards.

1. Tap the “**Refer**” tab at the top of the page.
2. Scroll down to the section titled “**Invite your friends to join the XMEV Community!**”
3. Tap **Copy** next to your personal **Web Invitation Link**.

You can share this link directly with friends, partners, or your team. Anyone who registers and activates their bot using your referral link will automatically appear in your team list and contribute to your cumulative volume.

✓ Your **Invitation Code** is also displayed below your link and can be shared manually if needed.

💡 *Tip:* Growing your team not only strengthens the community but can also unlock additional performance rewards and bonuses.
