Hello everyone! It is great to see all of you here. Welcome to our SMARTS in-group webinar. I'm Brandon Wong, Head of Marketing at SMARTS, and tonight we're going to break everything down in a clear, simple, and powerful way so you understand exactly how SMARTS works and where we are heading next.

Our community has grown rapidly across different countries, and many new users are joining every single day. So, this session is designed to give you the most updated, most accurate picture of the SMARTS ecosystem.

I'll be taking you through the first part of the presentation, and after that, our Regional Marketer James Chen will jump in to cover the community rewards and growth structure.
We have a lot of exciting things to share, so let's get started!

SMARTS is a multi-chain MEV automation platform that runs nonstop across Solana, Binance Smart Chain (BSC) and Ethereum (ETH). Our system monitors the meme pool in real time and executes on chain arbitrage and sandwich strategies automatically.

The entire purpose of SMARTS is simple. We want everyday users to benefit from the same MEV technology that used to be available only to advanced traders and private firms. You activate your bot, let the engine work, and the system executes the trades with speed and precision.
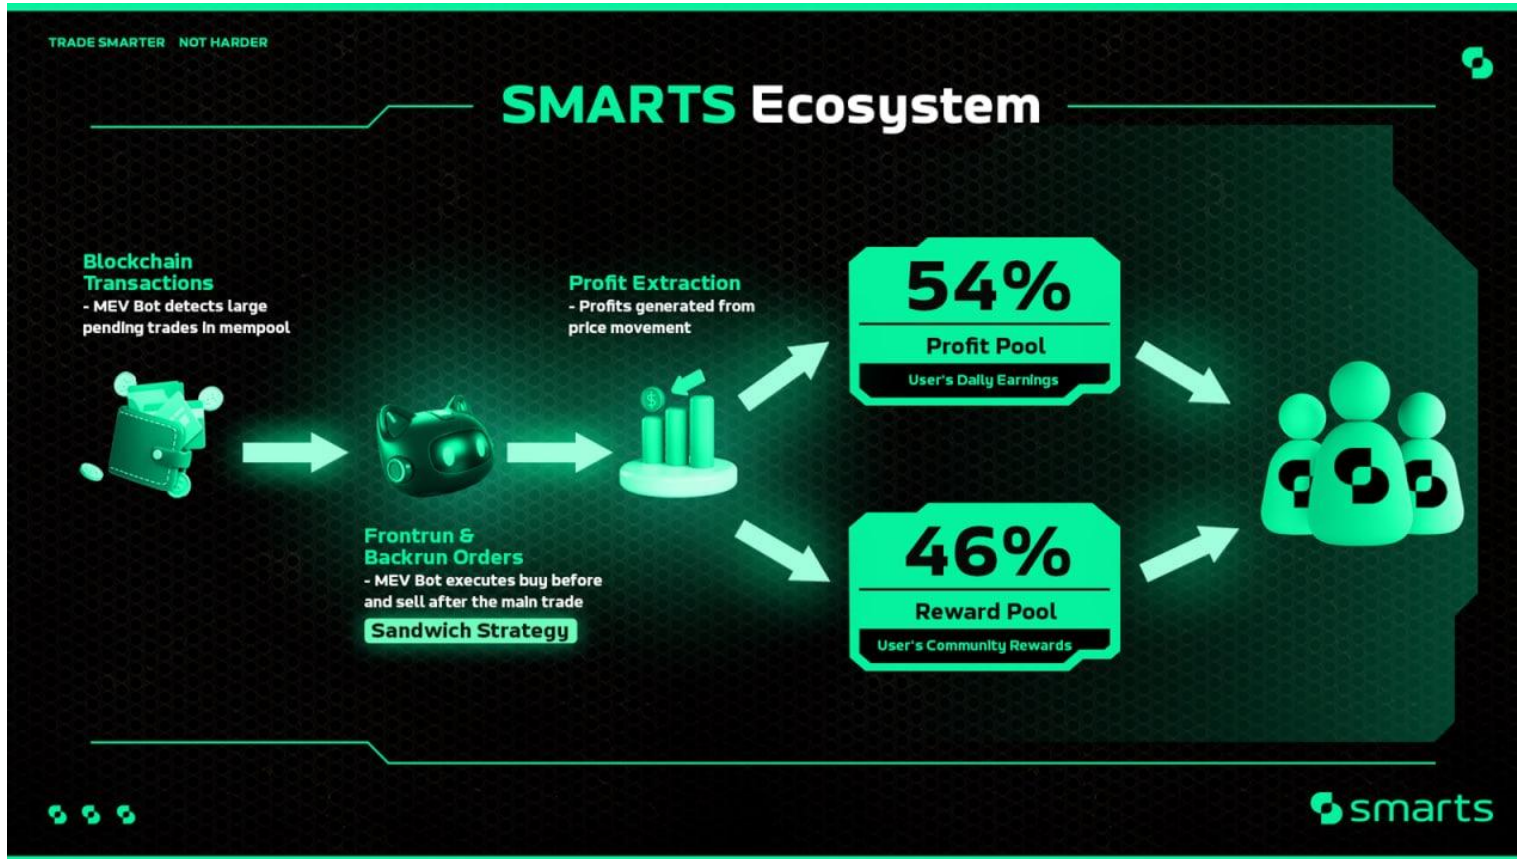

Here you can see how the SMARTS ecosystem flows.

The bot scans blockchain transactions and detects large pending trades. When there is a profitable opportunity, it executes a frontrun and backrun to capture the price difference. The profit then gets extracted and distributed into two pools.

54%* of the extracted profit goes to the user as daily earnings. And 46% goes into the reward pool, which powers the community structure. This is what allows leaders and builders to scale their network while earning real rewards from actual on chain activity.
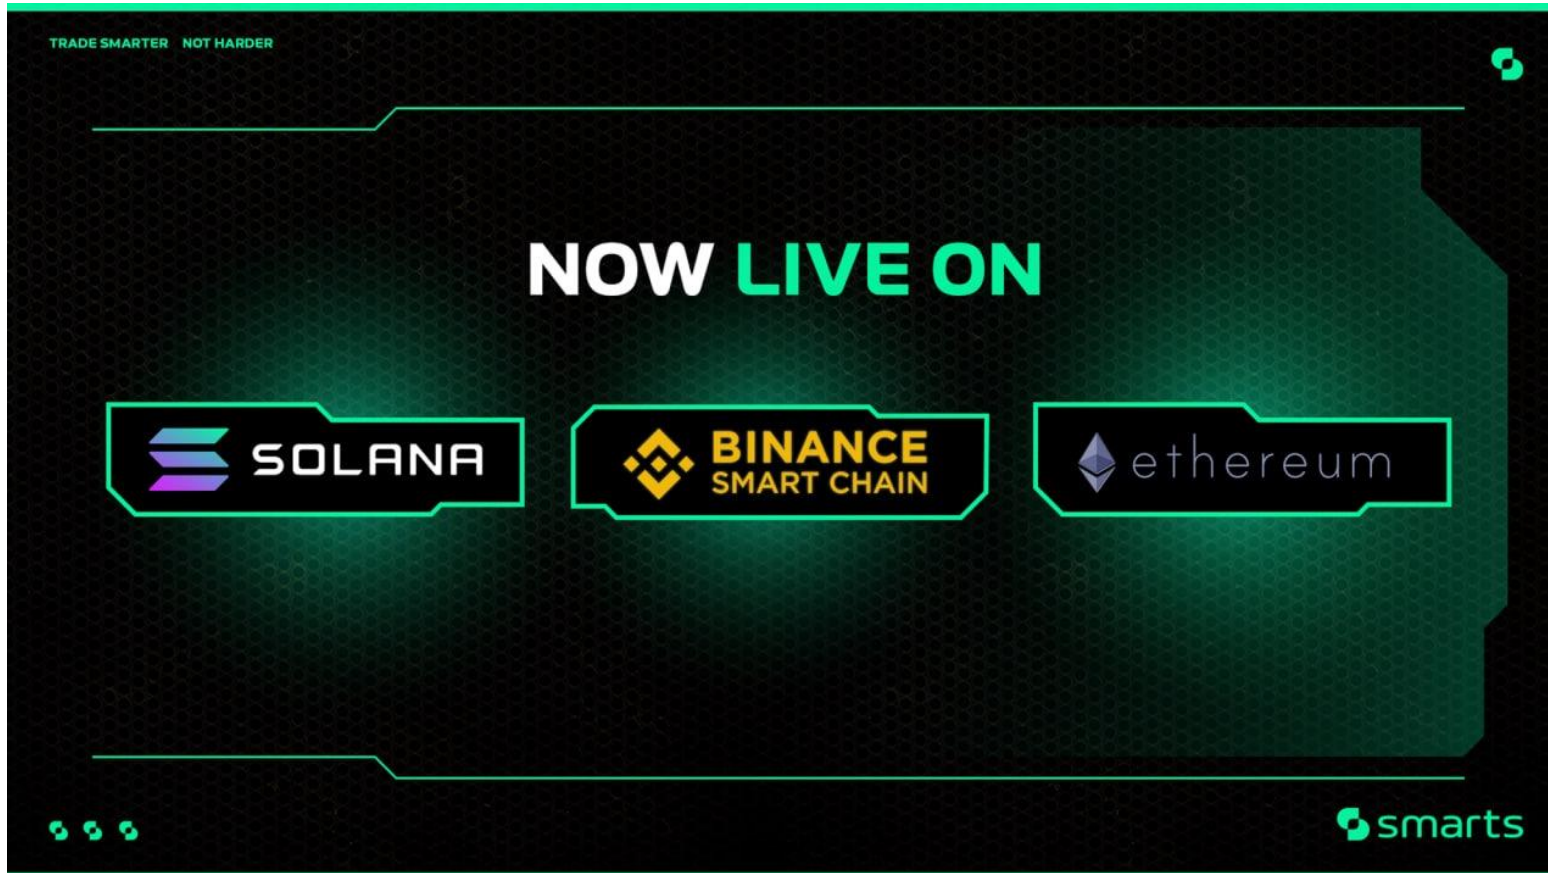

SMARTS is fully live on multiple chains. We started on Solana (SOL), expanded to Binance Smart Chain (BSC), and now we are live on Ethereum (ETH) as well. This multi chain capability is what gives SMARTS long term stability. When one chain is quiet, another chain may be active, giving users steady and consistent performance.
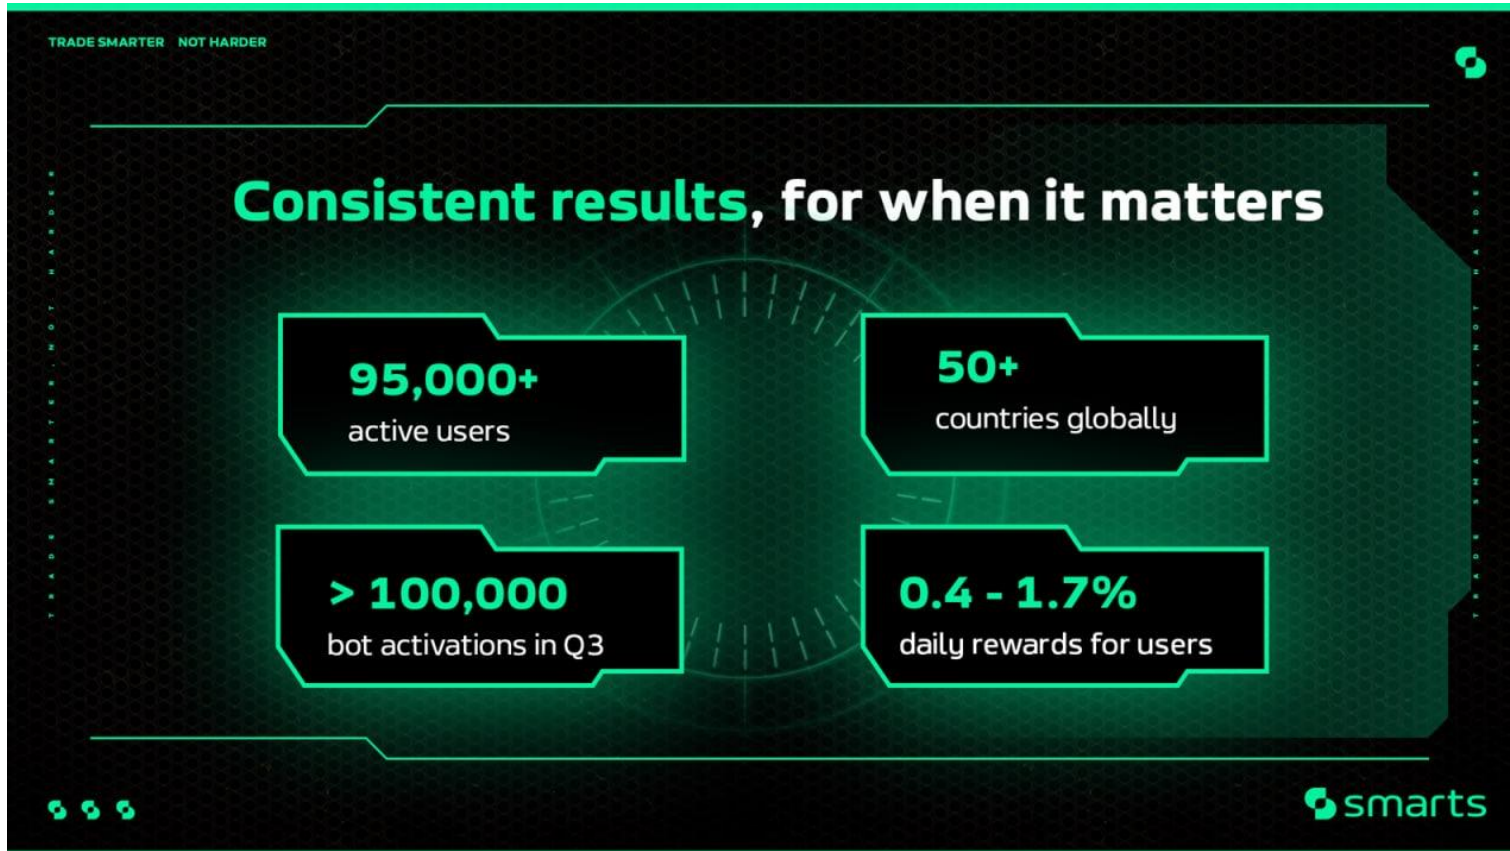

Today SMARTS has more than 95,000 active users across 50+ countries. In Q3 alone, we recorded over 100,000 bot activations.

Daily results remain consistent, averaging between 0.4% to 1.7% depending on market conditions. These are real on chain outcomes, not fixed returns or promises.

Now I'll share a short video that showcases a *LIVE sandwich trade* happening on the Solana chain. This will give everyone a clear visual understanding of how the bot detects the opportunity, executes the trade, and extracts the profit. Kindly watch and enjoy the demo. (CLICK THE LINK UNDER:

LIVE SANDWICH TRADING DEMO!!

TRADE SMARTER

MEV Bot subscription: **$49.90** ($99.9)

SMARTS Contract Option: **SMARTS CONTRACT**

Contract Duration	Profit Sharing(User:Platform)	Minimum Deposit (USDT)	Maximum Deposit (USDT)
1 DAY	50 : 50	20	100
7 DAYS	55 : 45	20	300
30 DAYS	65 : 35	100	1000
100 DAYS	80 : 20	100	NO MAX
180 DAYS	90 : 10	100	NO MAX

TERMS & CONDITIONS

- Users must activate MEV bot subscription before activating any contract
- Profits released daily — minimum withdrawal $10, instant withdrawal
- For 7, 30, 100days contracts, early termination is allowed but terms and conditions apply.
- 1day & 7days contracts: one at a time, no auto-renew or auto-reinvest
- 30days, 100days and 180days contracts: multiple activations allowed, with auto renew & auto reinvest options

NOT HARDER

SMARTS offers *1 day, 7-day, 30-day, 100-day, and 180-day contracts. Each one has different profit sharing and flexibility levels. The 180-day contract gives the highest profit share, because it allows the bot to run longer MEV cycles and compound more effectively.

*Daily profits are released every day, and users can *withdraw instantly* once they have 10 USDT in their wallet.

For flexibility, the 7-day, 30-day, and 100-day contracts allow early termination. Users receive their full capital back, while the system simply resets the accumulated profits. This keeps the principal protected.

Only the 1 day and 180-day contract do not support early termination. The 1 day finishes quickly on its own, and the 180 day is built specifically for long term growth.

SMARTS also supports compounding on the 7-day, 30-day, 100-day, and 180-day contracts, and users can switch compounding on or off anytime they choose.

SMARTS Auto-Reinvest Growth Chart

Turn Daily Profits into Long-Term Wealth

CPI (USDT)	Daily 1%	Weekly 7.21%	Monthly 34.78%	3 Months 170.48%	6 Months 499.58%	1 Year 3640.93%
$100	$101	$107.21	$134.78	$270.48	$599.58	$3,740.93
$500	$505	$536.07	$673.92	$1,352.41	$2,997.90	$18,704.67
$1,000	$1,010	$1,072.14	$1,347.85	$2,704.81	$5,995.80	$37,409.34
$5,000	$5,050	$5,360.68	$6.739.24	$13,524.07	$29,979.01	$187,046.70
$10,000	$10,100	$10,721.35	$13,478.49	$27,048.14	$59,958.02	$ 374,093.41

$100,000	$100,000	$107,213.54	$134,784.89	$270,481.38	$599,580.20	$3,740,934.09

SMARTS helps you build real, sustainable passive income

This chart shows how strong compounding can be when daily profits are reinvested automatically. Whether someone starts with 100 USDT, 500 USDT, or 10,000 USDT, the growth becomes very clear over 3 months, 6 months, and 1 year.

Compounding simply means your daily profit is added back into your contract capital, so the bot has more capital the next day to extract even more profits for you. The system grows step by step.

For example, if a user starts with 100 USDT and earns 1%* in a day, the next day the contract runs with 101 USDT. Soon it becomes 102, 103, 104 USDT, and it keeps building. These small daily increases stack into strong long-term growth, and the effect becomes even faster with 500 USDT or 10,000 USDT.

Community Reward (10% / 5%)

Generate community rewards based on your team's total contract profit

- powered by a strong and healthy community structure
- As trading happens, profits are generated, and your community grows together every single day.
- 46% Reward Pool Extracted by MEV Bot

Scenario 1

A —invite— B

(B Activated 500$ contract)

A unlocked 5 community reward levels (10%, 5%, 5%, 5%, 5%)

Scenario 2

(B Activated 1000$ contract)

A —invite— B
A —invite— C

(C Activated 1000$ contract)

A unlocked 20 community reward levels (10%, 5% from Level 2 to Level 20)

Requirement To Unlock Each Level

LEVEL	Total Direct Referral Contract Volume	Community Rewards (%)
1	100	10%
2	200	5%
3	300	5%
4	400	5%
5	500	5%

10	1000	5%

20	2000	5%

NOT HARDER

Users can *enjoy Community Rewards up to 20 levels*:

• Level 1: Earn 10%* from your direct referrals*

• Levels 2–20: Earn 5% from your affiliate referrals

To unlock each additional level, it requires additional $100 per level.

For example:

• Unlock Level 1 with $100

• Unlock Level 5 with $500

• Unlock Level 10 with $1000

...and so on, up to Level 20.

In SMARTS, Community Rewards are not derived from referral deposits.

Instead, they are calculated based on the daily total contract profit generated by your team.

All Community Rewards are distributed from the 46% Reward Pool, which is distributed by the profits extracted through the SMARTS MEV Bot. This structure is designed to support a healthy, transparent, and sustainable ecosystem for the community.
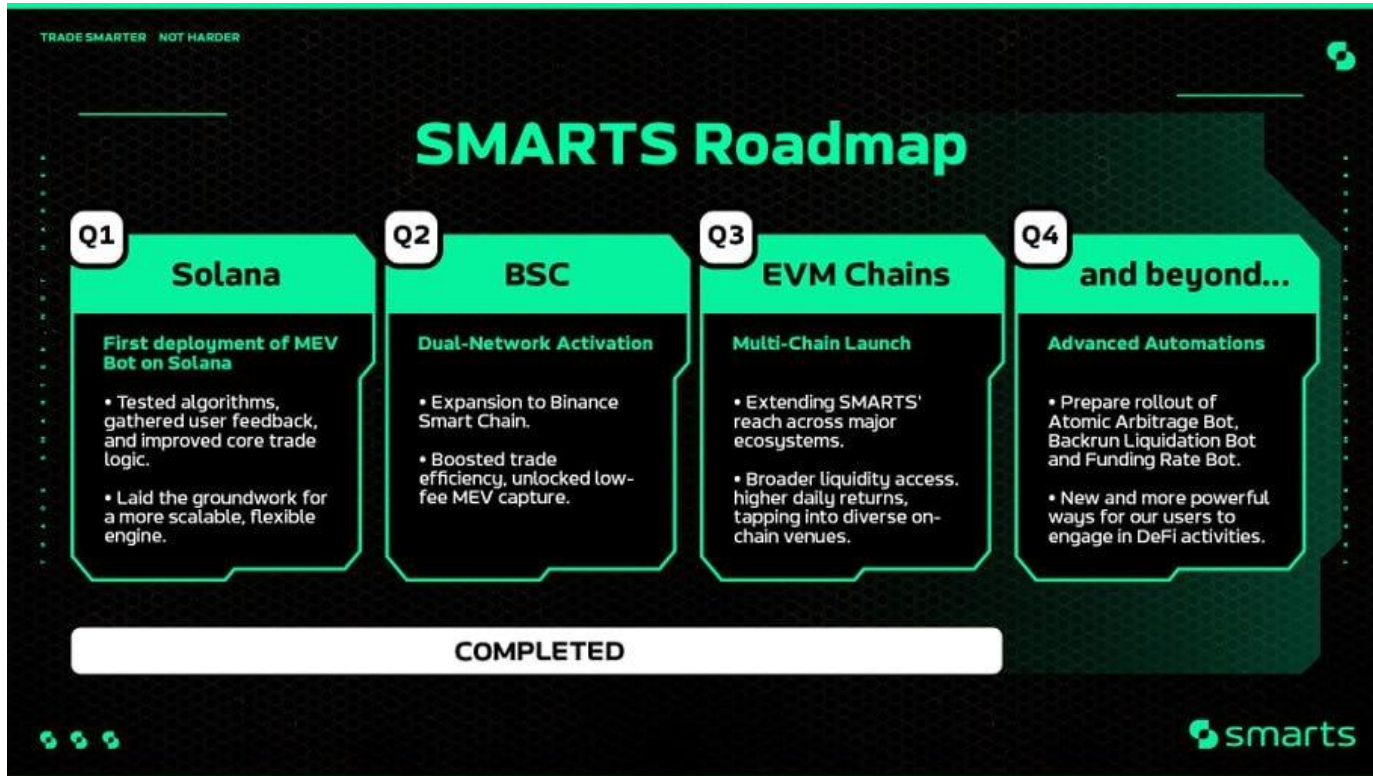

🚀 *SMARTS Roadmap Highlights*

🔷 25 May 2025 — Solana Official Launch

First deployment of the MEV Bot. Foundation built for scalable automation.

🔷 28 June 2025 — BSC Integration

Dual-chain activation → more liquidity, better efficiency, higher daily capture.

🔷 12 October 2025 — EVM Chains Go Live

SMARTS enters multi-chain ecosystems, unlocking bigger profit opportunities.

🔷 Coming Next — Advanced Automations

Atomic Arbitrage, Backrun Liquidation, Funding Rate Bot...

More strategies. More MEV. More power for users.

Each launch takes SMARTS to a new level. Solana → BSC → EVM... and what's coming next will push profitability even further.

THANK YOU

One platform. Limitless opportunities.
